

Some of us could use a little boost.

If these two odd balls start to seem a bit flat,
you can reinflate them with a bike pump.

Moisten the needle first and be oh-so-careful...
if you overinflate them, these two will
quickly get out of shape.
(A lot of hot air can do that to a ball!)

The other two balls are NOT inflatable.
Hug, squish, and roll them all you want,
but please don't try to blow them up.
